

ePoP LPDDR4X

BIWIN ePoP LPDDR4X integrates LPDDR4X DRAM and eMMC 5.1 storage into a Package-on-Package (PoP) solution with a 144-ball FBGA package.

With a compact size of just 8.00 x 9.50 mm, it achieves sequential read and write speeds up to 290 MB/s and 140 MB/s, with frequency up to 4266 Mbps.

BIWIN ePoP LPDDR4X offers capacity up to 64 GB+32 Gb. It is a next-generation storage solution designed for high-end smartwatches.

Compared to previous generations, this solution features a 128.6% increase in frequency, a 32% reduction in size, and is certified by the Qualcomm 5100 platform.

Key Features

Ultra-Thin Form Factor

The BIWIN ePoP LPDDR4X employs cutting-edge packaging technologies, including multi-layer die stacking, ultra-thin die, and multi-chip heterogeneous integration. With a thickness of just 0.65 mm, this highly compact form factor significantly reduces required PCB space, making it an ideal storage solution for the design of ultra-slim, lightweight smart wearable devices and next-generation mobile electronics.

High Integration

The BIWIN ePoP LPDDR4X integrates eMMC 5.1 and LPDDR4X into a single package, achieving data transfer speeds up to 4266 Mbps and read speeds up to 300 MB/s, offering smooth performance even in multi-threaded and high-load scenarios.

Exceptional Reliability and Stability

Featuring global wear leveling, LDPC error correction algorithms, and FFU (Field Firmware Update), the BIWIN ePoP LPDDR4X delivers stable operation under long-term, high-intensity usage. These advanced features provide continuous, high-performance support for mission-critical applications and demanding environments.
